

Wynfrith Riemer

Brief CV

Had his University education in geology and physics.

Started working in 1962 as engineering geologist with Ruhrtalsperrenverein in Germany on the rehabilitation and construction of dams and related structures. Subsequently continued with similar activities in Europe and other continents with Interfels/Terraconsult until 1969. Changed in that year to Electro Watt hydraulic works department and with that company until 1974 spent much time on various projects in Greece (e. g. Development of the Thessaly Plain, Pinios Ilias, Polyfyton).

In 1974 joined a company in the Salzgitter Group, which mainly concentrated on groundwater development and looked after projects in Africa, Indonesia and South America.

Since 1978 he has been working as an independent consultant, specialized in engineering geology of dams, underground works and slope stability as well as hydrogeology related to dams and to groundwater development. In these fields had assignments in more than 65 countries as special consultant, member of review panels and quality assurance boards and assisted in settlements of construction disputes.
